'WE HOPE SHE WILL JOIN ATKINS AND BECOME ONE OF OUR ENGINEERS OF THE FUTURE.'
—

ATKINS USES CAREERWISE TO IDENTIFY ENGINEERS OF THE FUTURE

Atkins Oil & Gas Engineering Student Placement

Atkins is one of the world's leading design, engineering and project management consultancies, providing unrivalled technical expertise and support to the energy industry.

Jessica supported the technical delivery of a number of projects by performing engineering calculations to assess the structural capacity of offshore oil and gas platforms. She gained exposure to international codes of practice and an appreciation of the Quality Assurance and checking processes adopted within a professional engineering office.

Michelle Magee, Structural Engineer said, 'Atkins seek to recruit hundreds of graduates annually across the various STEM disciplines. To recruit a graduate who already commands a degree of experience is very valuable. The Careerwise placement has benefited both the student and the company greatly.'

Dr Khaled El-Deeb, Technical Director at Atkins said, 'We were impressed with Jessica, so we put her through an assessment centre for consideration for employment for next year and we were impressed with her scores. We hope she will join Atkins and become one of our engineers of the future.'

ATKINS

Edinburgh Napier
UNIVERSITY

‘THE PLACEMENT
GAVE ME
CONFIDENCE
IN MY CAREER
CHOICE
AND IN MY
ENGINEERING
ABILITIES.’

Don't take our word for it, hear what Jessica said about her placement:

Jessica Flett

University of Edinburgh 4th year, Masters of Engineering

I worked in the off-shore structure team, analysing oil rig platforms from around the world, looking at their strength, carrying out fatigue analysis and many other types of analyses using different computer software. I enjoyed the placement thoroughly and it definitely exceeded my expectations.

This was the first placement I had done and I was nervous about managing the work and coping in an office environment. My concerns were quickly eradicated as I was given as much help as needed and I was able to carry out real engineering work.

The placement gave me confidence in my career choice and in my engineering abilities and I now feel much more certain that engineering is the right career for me.
